Moments To Go

Moments to share

Autumn/Winter 2026

Welcome to a new season filled with warmth and moments to share with us at Sagaform. As autumn slowly sets in and winter approaches, we gather around what matters most – each other. Around the large table with many guests, where conversations flow and evenings grow long.

We set the table for the first dinners of autumn together and let the home fill with life and movement. It is in these moments, big and small, that memories are created again and again. With beloved traditions and care, we welcome the crisp autumn and the atmospheric Christmas season, always with our own little twist.

The colour palette of the season draws its inspiration from the depth and contrasts of nature. Deep reddish-brown tones with a golden glow are balanced by denim blue shades and forest-inspired greens. Together they create a cosy and inviting feel, made for vibrant table settings and memorable moments.

We proudly present new Swedish Originals, products that carry our heritage and are created to live on in many homes for a long time. Our Gurken series, designed by Daniel Enoksson, continues to evolve and now introduces carafes that both spark curiosity and naturally take their place on the table.

Sagaform novelties

The autumn and winter collection includes many new products for the kitchen, created to be both used and displayed. Here, the rustic meets the elegant, where layers build a personal whole and a sense of care in every detail. At the same time, we bring life beyond the home with us. Our appreciated Moments To Go series continues to grow with products that follow in movement and everyday life. From the gym to yoga sessions and out into the forest, always with the same sense of form and function.

Our material choices – glass, certified wood, recycled stainless steel, recycled cotton, wool and marble reflect our continued

commitment to sustainable choices. We know that every little detail matters and that the products we surround ourselves with also say something about what we want to leave behind. The year 2026 also marks our 30th anniversary. We celebrate this with an extra touch of gold throughout the collection, in materials, details and expression. A tribute to our heritage, Scandinavian design and moments to share.

Welcome to autumn and winter 2026 with Sagaform, where we gather, share and create memories together. From the warmth of home to moments in motion.

Sustainability for the future

It should be easy to make good choices, which is a key part of the development of our sustainability work. At Sagaform AB, we put great emphasis on sustainability in our processes and take responsibility for how our operations affect people and the environment. Of course, we hope that you are satisfied with your purchased products but also with us as a company.

As part of the New Wave Group, we pursue active sustainability work towards a vision of sustainable growth where business solutions are not only financially favorable but also sustainable from a social and environmental perspective. What makes the biggest difference is how we conduct our everyday business. That is why we are working to integrate sustainability issues into our core business. The work includes, for example, improved working conditions in production countries, progressive chemical work, and streamlining transport and logistics.

Our common main goal with the sustainability work is to create products with the longest life possible, to minimize the product’s negative impact on people and the environment during its life cycle. In our work, we take into account all three dimensions of sustainability –social, environmental, and economic.

One of our strengths is that we have our own CSR staff in place in the production countries who work full time on these issues. The work includes, for example, improved working conditions, progressive chemical work, and streamlining transport and logistics. Through internal controls in combination with independent reviews, we make sure that our products are produced under good social conditions and do not contain any harmful chemicals.

You can read more about how we work with CSR and sustainability on the parent company’s website www.nwg.se. There we have gathered all information about important activities, collaborations, and goals for the future.

Give away a Swedish Original

At Sagaform we care about relationships. That is why we always regard our design as a great gift to someone we love but also for ourselves. The gift should be easy to give away with the purpose to raise many smiles on the receivers’ faces.

Classic Scandinavian design in combination with carefully chosen details radiating stylish simplicity characterizes what we call Swedish Originals. Functional quality products caring about the familiar and which are created to be used and appreciated in many homes by many families for a long time to come. All of them packaged in a way which is appreciated and received just as they are.

Each piece is crafted with care, rounded bases and gentle curves are contrasted by a solid rim adorned with Sagaform's signature stripes. The mugs are stackable and available in both handled and handleless versions for ultimate flexibility. Made of New bone China. Dishwasher safe and food safe. Design Studio Sagaform.

Anton Björsing

Anton Björsing has his background from the distinguished Carl Malmsten School in Stockholm where he studied furniture design focusing on wood. Before that he explored design and wooden handicraft at the Steneby School. The austere Scandinavian design language runs like a thread through Anton Björsing's work. He works mostly with oak in combination with stoneware and glass, which gives the products a further dimension of exciting material contrasts.

Coffee & More

Coffee & More is one of Sagaform’s most expressive and personal series created in collaboration with designer Margot Barolo. A tribute to the bold, playful language of the 1970s, it celebrates everyday moments with a little extra character. With its distinctive relief patterns, strong silhouettes and generous forms, Coffee & More brings a unique blend of nostalgia and modernity to the table.

The collection includes mugs, bowls, plates, jugs and more - all designed to be used often, loved for years and bring joy to every meal, from morning coffee to weekend dinners. Coffee & More is more than just design, it’s a feeling. Made of stoneware. Dishwasher safe and food safe. Design: Margot Barolo for Sagaform.

Margot Barolo

Designer Margot Barolo was educated at Beckmans and also has a master’s degree in ceramics from Konstfack. She has for a long time successfully worked with the Swedish art industry and during recent years also started challenging the picture of the production around this. Margot Barolo’s unique design language and her love of ceramics shows in Coffee & More, the dinner service designed for Sagaform.

Included in the series are stackable bowls, coffee cups, latte mugs and plates with inspiration from the 70’s and its passion for ceramics with straight lines broken off by a multitude of patterns and playfulness. Her design language is tied together in peaceful nuances, high-gloss glazing and ornamented throughout in relief.

What is rPET?

rPET stands for "Recycled Polyethylene Terephthalate". rPET is a type of thermoplastic polymer used to manufacture many common products, such as plastic bottles for beverages and food packaging. rPET is simply recycled PET plastic. It is produced by recycling used PET products from the consumer stream, primarily plastic bottles. The process involves collecting plastic bottles, crushing them, and melting them down to create new plastic material. The recycled material can then be used to manufacture a variety of products, including bottles, packaging, textiles, and other plastic products. In this case, Billi.
